

ModbusRTU

Sample gas cooler RC 1.2 Rack

Sample gas coolers are used in extractive gas analysis. The sample gas is taken from the process and may contain impurities such as particles or moisture that can damage the measuring cells or influence the measurement results. For this reason, the moist gas is cooled below the dew point in the sample gas cooler, causing the moisture to condense so it can be removed from the system.

The RC 1.2 Rack is a compact 19-inch format compressor sample gas cooler, ideal for system cabinets. With the option of simultaneous cooling of two gas paths, the cooler offers a high degree of flexibility. Thanks to its modular design, the RC 1.2 Rack can be individually equipped with integrated humidity sensors, filters and condensate pumps to meet your specific requirements.

The natural refrigerant R600a meets the requirements of EU Regulation (EU) 2024/573 and is a very environmentally friendly solution thanks to the reduction in CO₂ emissions. At the same time, it ensures the future-proof operation of your systems that comply with legal requirements in the long term.

19-inch housing as a slide-in unit for system cabinets or for wall mounting

Simultaneous cooling of 2 gas paths possible

Efficient cooling with a nominal output of 320 kJ/h

Accurate setting of the gas outlet dew point in a range from +3 °C to +20 °C with a constant dew point stability of ± 0.1 K

Adjustable tolerance ranges (alarm thresholds) for the setpoint temperature of the measuring gas cooler

Ambient temperature from +5 °C to +50 °C

Future-proof and climate-friendly: Use of natural refrigerants instead of HFC refrigerants

Modular: Moisture detector, filter and condensate pump

Option: Signal output 4 - 20 mA for function and temperature monitoring

Option: Digital output (Modbus RTU) for device configuration and access to process and diagnostic data

Overview

The compact system RC 1.2 Rack is a 19" rack with a sample gas cooler and condensate drain, particle filter and moisture detector for up to two gas paths.

The compressor coolers are distinguished by two types based on the cooling nests. This classification is reflected in the type designation. The exact item number of the model defined by you is determined by the model code in the ordering information category.

Application	Cooler model	Heat exchanger
Standard	RC 1.2 Rack	1 or 2 heat exchangers

Additional components which every conditioning system should feature can optionally be integrated:

- Peristaltic pump for condensate separation,
- Filter,
- Moisture detector.

In addition, we offer a range of signal outputs:

- Status output,
- Analogue output, 4...20 mA, incl. status output,
- Modbus RTU digital output, incl. status output.

This allows for various configurations of the cooler and its options. Here the approach is to simplify the creation of a complete system in a cost-efficient way using pre-installed components with hoses connected. We also prioritised easy access to wear parts and consumables.

Gas cooler technical data

Gas Cooler Technical Data			
Rated cooling capacity (at 25 °C):	320 kJ/h		
Ambient temperature:	5 °C to 50 °C		
Ready for operation:	after max. 15 minutes		
Gas outlet dew point preset:	5 °C		
adjustable:	3 °C to 20 °C		
Dew point fluctuations static:	± 0.1 K		
in the entire specification range:	± 1.5 K		
Temperature difference between heat exchangers:	< 0.5 K		
IP rating:	IP 20		
Installation:	19" rack mounting housing or wall mounting		
Housing:	Stainless steel		
Packaging dimensions:	approx. 550 x 420 x 340 mm		
Weight:	approx. 16 kg		
max. altitude:	Altitudes up to 2000 m		
Refrigerant:	R600a (26 g)		
Electrical connection:	Plug per DIN EN 175301-803 + 12-pin Plug connector		
Contamination level:	2		
Overvoltage category:	II		
Electrical data:		230 V	115 V
<i>Available options may result in details that differ from these</i>	Tolerance:	+/-10% at 50 Hz +/-10% at 60 Hz	- +/-10% at 60 Hz
	Typical power input:	322 VA	288 VA
	max. operating current:	1.4 A	2.5 A
	Starting current:	2.3 A	3.6 A
	Protection:	4 A (delayed action)	4 A (delayed action)
Status output switching capacity:	33 V AC/70 V DC 1A, potential-free		
Condensate outlet:	Hose nipple Ø5 mm or with screw connection (metric/US)		
Parts in contact with media			
Filter:	see "Technical Data - Options"		
Moisture detector:	see "Technical Data - Options"		
Heat exchanger:	see table "Heat Exchanger Overview"		
Peristaltic pump:	see "Technical Data - Options"		
Tubing:	PTFE/FKM (Viton)		

Technical Data - Options

Analogue Output Technical Data

Signal:	4-20 mA or 2-10 V corresponds to -20 °C to +60 °C cooling block temperature
Connection:	M12x1 connector, DIN EN 61076-2-101

Technical Data, digital output

Signal:	Modbus RTU (RS-485)
Connection:	M12x1 connector, DIN EN 61076-2-101

Technical Data Cpsingle Condensate Pumps

Ambient temperature:	0 °C to 60 °C
Voltage tolerance:	± 5%
Flow rate:	0.3 L/h (50 Hz)/0.36 L/h (60 Hz) with standard hose
Inlet vacuum:	max. 0.8 bar
Inlet pressure:	max. 1 bar
Outlet pressure:	1 bar
Weight:	0.47 kg
Hose:	4 x 1.6 mm
Condensate outlet:	Hose nipple Ø5 mm Screw connection 4/6 (metric), 1/6"-1/4" (US)
IP rating:	IP 40
Materials	
Hose:	Tygon (Norprene)
Connections:	PVDF

Technical Data FF-3-N Moisture Detector

Ambient temperature:	3 °C to 50 °C
max. operating pressure with FF-3-N:	2 bar
Weight:	0.04 kg (incl. cable)
Material:	PVDF, PTFE, epoxy resin, stainless steel 1.4571, 1.4576

Technical Data Filter AGF-FA-5

max. operating pressure with filter:	2 bar
Filter surface:	42 cm ²
Weight:	0.30 kg
Filter fineness:	2 µm
Dead volume:	28.5 ml
Materials	
Filter:	PTFE, PVDF, DURAN glass (parts in contact with media)
Seal:	FKM (Viton)
Filter element:	PTFE sintered

Typical installation arrangement (1 gas path)

1 Cooler/cooling nest 1	3 Filter (optional)
2 Moisture detector (optional)	4 Condensate Pump

Performance data

Note: The limit curves for the heat exchangers exchanger apply to a dew point of 40 °C.

Heat exchanger description

The energy content of the sample gas and the required cooling capacity of the gas cooler is determined by three parameters: gas temperature ϑ_G , dew point τ_e (moisture content) and volume flow v . The outlet dew point rises with increasing energy content of the gas. The following limits for the maximum flow are specified for a standard operating point of $\tau_e = 40^\circ\text{C}$ and $\vartheta_G = 70^\circ\text{C}$. The maximum flow v_{\max} in NI/h of cooled air indicated, so after moisture has condensed. Values may differ for other dew points and gas inlet temperatures. However, the physical facts are so vast we decided to omit the illustration. Please contact our experts for clarification or refer to our calculation programme.

Heat exchanger overview

Heat exchanger	PTS PTS-I ²⁾	PTG	PTV PTV-I ²⁾
Materials in contact with media	Stainless steel	DURAN Glas PTFE	PVDF
Weight	0.5 kg	0.2 kg	0.125 kg
Flow rate v_{\max} ¹⁾	500 NI/h	280 NI/h	280 NI/h
Inlet dew point $\tau_{e,\max}$ ¹⁾	65 $^\circ\text{C}$	65 $^\circ\text{C}$	65 $^\circ\text{C}$
Gas inlet temperature $\vartheta_{G,\max}$ ¹⁾	180 $^\circ\text{C}$	140 $^\circ\text{C}$	140 $^\circ\text{C}$
Max. Cooling capacity Q_{\max}	150 kJ/h	90 kJ/h	90 kJ/h
Gas pressure p_{\max}	160 bar	3 bar	2 bar
Pressure drop Δp ($v=150 \text{ L/h}$)	10 mbar	10 mbar	10 mbar
Dead volume V_{dead}	29 ml	29 ml	57 ml
Gas connections (metric)	6 mm	GL 14 (6 mm) ³⁾	DN 4/6
Gas connections (US)	1/4"	GL 14 (1/4") ³⁾	1/4"-1/6"

Ordering instructions

Gas cooler with one or two heat exchangers

The item number is a code for the configuration of your unit. Please use the following model code:

4596	3	X	2	0	X	X	X	X	X	0	X	X	X	0	0	0	0	0	Product characteristic
																			Housing type
																			19" housing for wall mounting
																			19" rack mount housing
																			Power supply
																			115 V AC, 60 Hz
																			230 V AC, 50/60 Hz
																			Gas paths
																			1 gas path
																			2 gas paths
																			Heat exchanger
																			1 0 Stainless steel, PTS, metric
																			1 5 Stainless steel, PTS-I, US
																			2 0 Duran glass, PTG, metric
																			2 5 Duran glass, PTG, US
																			3 0 PVDF, PTV, metric
																			3 5 PVDF, PTV-I, US
																			Condensate drain
																			0 without condensate drain
																			1 1 CPsingle with hose nipple, angled
																			5 2 CPsingle with hose nipple, angled ¹⁾
																			6 1 CPsingle with hose nipple, straight
																			7 2 CPsingle with hose nipple, straight ¹⁾
																			Filter and moisture detector
																			0 0 without filter, without moisture detector
																			5 0 1 filter, without moisture detector
																			5 1 1 filter, 1 moisture detector
																			6 1 2 filters, 1 moisture detectors ¹⁾
																			6 2 2 filters, 2 moisture detectors ¹⁾
																			Signal outputs
																			0 status output only
																			1 Analogue output, 4..20 mA, incl. status output
																			2 Modbus RTU digital output, incl. status output

¹⁾ Option only available if two gas paths present.

Spare parts and accessories

Item no.	Description
41151050	Filter element FE-4; Unit 8 count
